Sometimes anti-virus software can report false positives. If this happens to you, we encourage you to submit the file you download to VirusTotal (a free, independent service which identifies malicious content) where you will see dozens of other anti-virus scanners report the file is perfectly safe.

The reason is that first the installer setup file is downloaded, and then the installer software does the work of fetching your driver from our fastest download server.. You may notice that the file size of the installer software is much smaller than the file size of your actual driver.. The installer setup file may include a purely optional advertising offer which you are free to decline..
